Brand Personality

FullFunnel is a global revenue operations services firm that helps organizations solve capacity and capability challenges in their sales and marketing programs.

Our personality and essence can be encompassed in the following words:

Logo

The FullFunnel logo prominently features the logo type in a clean and bold typeface with a supporting brand mark.

It forms the basis of our core identity - and is a major representation of our brand. It has a vital role in establishing brand awareness therefore should be used in all our communications in proper, approved forms.

Logo

Clear Space

To ensure the logo maintains a high level of visibility it is important that it is surrounded by a minimum amount of clear space. No other graphic elements should encroach within this area. The exclusion zone is equal to the height of the brand mark above, below and at both sides. It creates a boundary around the logo.

Minimum Size

To preserve the readability of the logo it should never be sized below certain dimensions. The minimum length is 50 mm when used in print and a length of 150 px in digital environments.

Colours

Our brands iconic colors are black and white with pops of blue. The light grey works as a neutral base for backgrounds and when white feels too overpowering.

Imagery

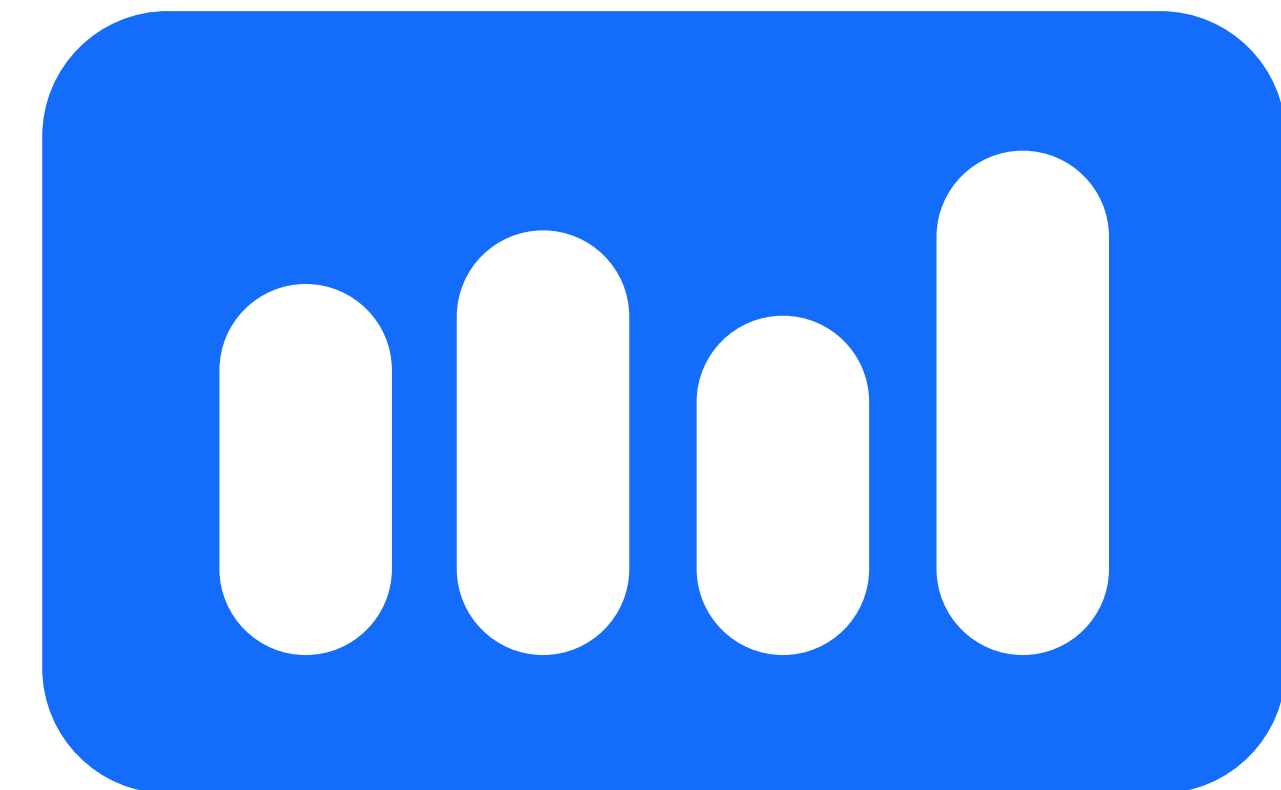

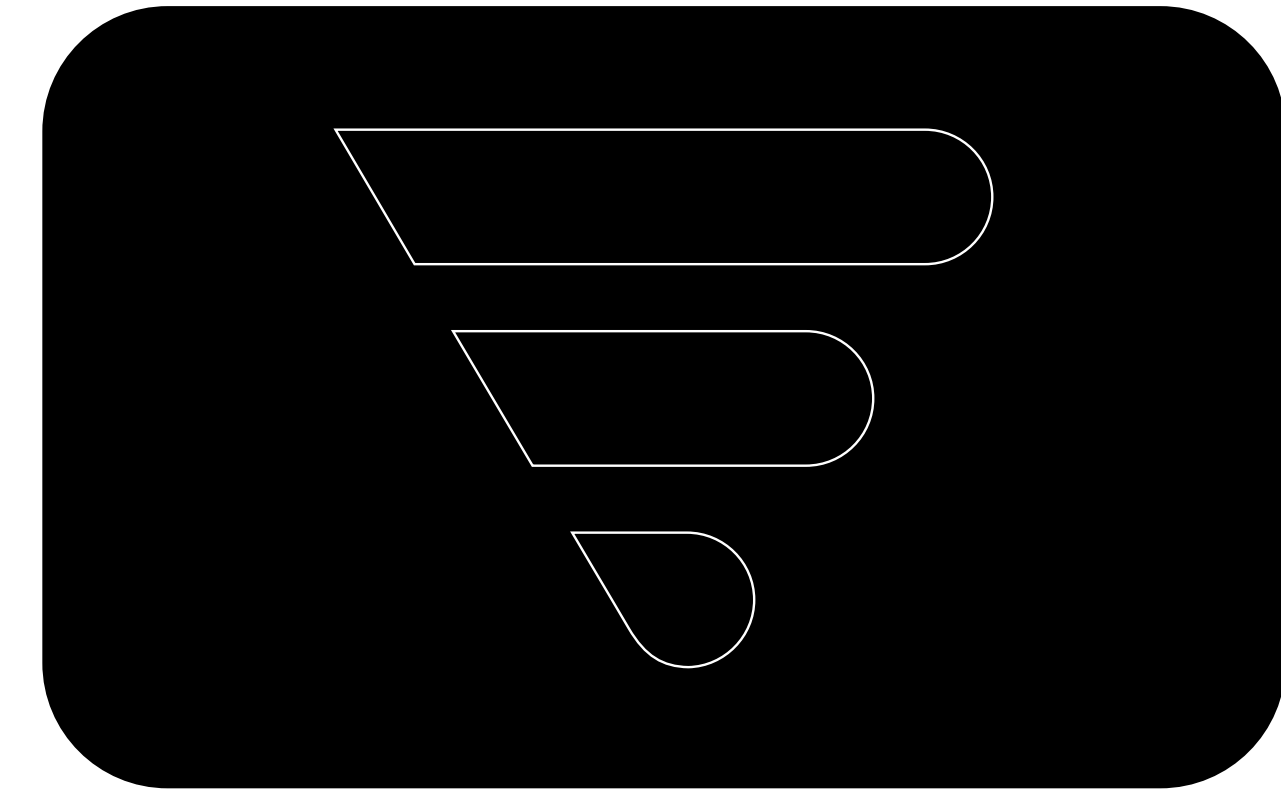

Photographs

Every image should appear natural and unposed and should contain colors that are less saturated and muted, without feeling too curated. This kind of directed imagery combined with our carefully crafted copywriting creates a clean aesthetic on all our touchpoints.

Graphics

Our brand steps away from heavy usage of icons and instead opts for the use of bold minimalistic shapes to help convey key information. The FullFunnel brandmark can also be used over solid backgrounds and photographs to add visual interest.

Social Media

The look and feel of our social media content should be simple and eye catching.
With a focus on bold text, hints of colour and strategic use of our core elements and imagery.
