Important

- Make sure your social accounts are **warmed up** (active for several weeks with a real posting history) **before** connecting. Brand-new or inactive accounts are far more likely to be flagged or banned by the platforms.
- Log into your social account **BEFORE** connecting
- Pinterest: your account is only enabled for publishing once it has at least **200 monthly views**. Pinterest reports this on your profile.
- Facebook: select each Page individually, **do not** select "connect all pages"
